MATSUI

MATSUI CHIPS
Where quality is a sure bet

Gaming Chips

Utilizing the most recent and accurate technology available, MATSUI has now extended their existing range of highly durable gaming chips. In addition to their hard wearing properties, all Matsui gaming chips feel great to the touch and are perfectly weighted for any casino player.

Glitter decals can make a basic design look more attractive. Glitter rings, logos, letters or denominations are an effective way to make chips more eye catching. Numerous glitter design types are available, but only one type per chip design can be used.

With the growing demand for a variety of decal features, we have applied our production and gaming knowledge to give you an attractive range of design options.

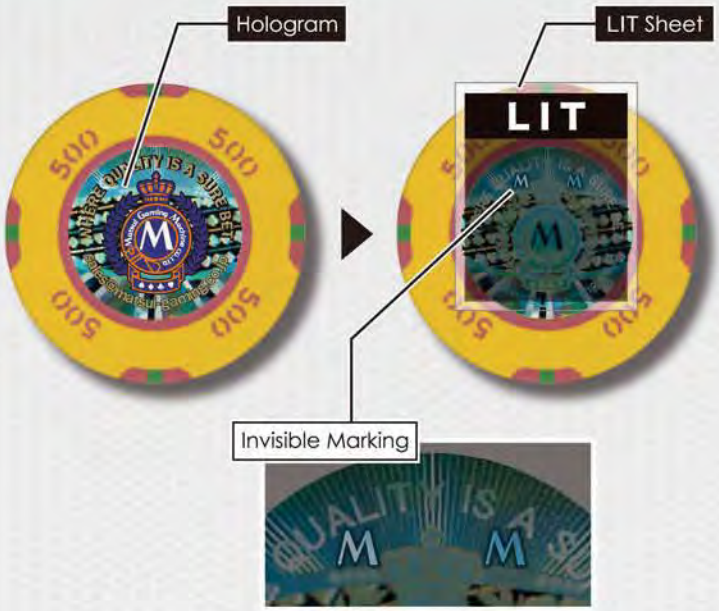
Hologram

Why not try our new hologram decal to make a more eye-catching design?

The hologram design is now common on many bank notes and passports, due to the difficulty in trying to replicate hologram properties.

If holograms are good enough for bank notes, then why not have them on your cash chips! Additional "LIT" (invisible UV markings) are also available as a further security measure that can only be seen under a special LIT sheet.

Truly a great mix of Matsui security and design.



Mirror Silver or Gold

Mirror Silver or Gold can give a similar appearance to our (Silver or Gold) coin chips. This effect is created using our unique ink range.

Serial Numbers

We can add serial numbers onto the rim of the chips, decal, coin inlay as well as our gold and silver chips.

INNER RING STYLE DECAL VALUE CHIPS

Matsui Inner Ring Decal Chips are our most popular and best-selling casino chips. We have a wide selection with a full range of denominations. The inner rings moulds are available in number only, $ and Euro and will fit 39mm, 40mm and 43mm chips. With this wide-ranging selection, we're sure to have the denominations you require and it's also possible to customize your own unique inner ring mould.

Adding to our already established range of high quality gaming chips, the MATSUI group are now pleased to offer Plaques & Jetons to the casino market. Available in virtually all shapes and sizes with reassurance of different security features, these products are proving themselves to be very good and exciting additions to our chip catalogue.

Rectangle

Rectangle (Corner Cut)

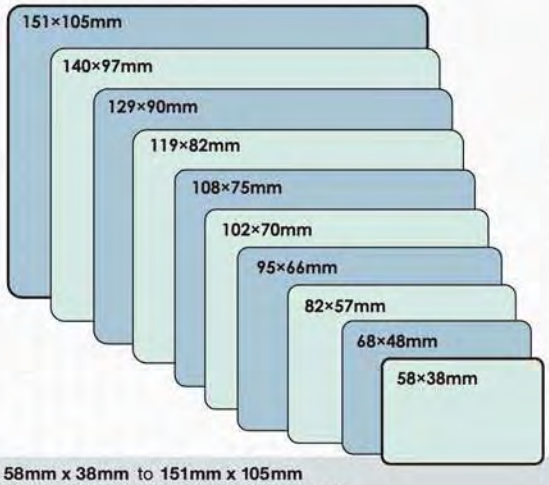
Oval

Jeton

SIZE

We can cut PLAQUES and JETONS to any size or shape from our extensive range.

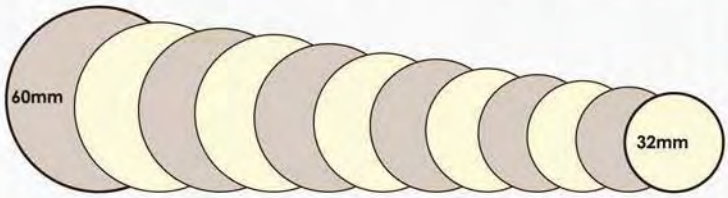
PLAQUES SIZE



58mm x 38mm to **151mm x 105mm**
(2.32 inch x 1.52 inch to 6.04 inch x 4.2 inch)

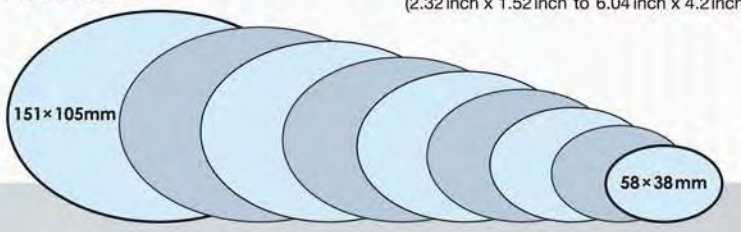
JETON SIZE

32mm to **60mm** in diameter
(1.28 inch to 2.4 inch)



OVAL SIZE

58mm x 38mm to **151mm x 105mm**
(2.32 inch x 1.52 inch to 6.04 inch x 4.2 inch)



UV Marking

■ Invisible UV Marking.

Green or red ultraviolet markings can be added to both chips and plaques to prove their verification.
The markings that can also be customized are only visible under a UV light.

Invisible UV Marking

■ Visible UV Marking.

Silver or gold printwork of the decal can be UV reflected.
The printed colours will glow green or red under a UV light.

Visible UV Marking

SECUR-e-CHIP ANTI-THEFT SYSTEM

The actual loss of gaming chips through internal theft is difficult for anyone to measure. With the MATSUI Secur-e-Chip system you can feel safe in the knowledge that no chips will be removed from the gaming floor without detection.

Contentment for Managers and Security.

Casino management can have peace of mind knowing that gaming chips will not be taken off the gaming floor by casino without their specific authorization.

Alarm Management

The "Secur-e-Chip" anti-theft system can be interactive with CCTV cameras and through SMS messaging alert security personnel in the event of attempted chip theft. When the chips pass through strategically placed security sensors, the alarm is activated. These chips can also be detected by hand held security devices.

How it works.

Electronic Article Surveillance (EAS) material is applied to the inside of the gaming chip. This then generates an invisible electro magnetic field that can trigger an alarm when it passes through electronic detection gates. Most casinos have a route that staff members must follow off the gaming floor. By using MATSUI's open or concealed EAS systems, you can ensure superb detection and stop all casinos gaming chip theft. An efficient installation enables most systems to be installed within half a day.

Amorphous Magnetic Chip
